

Sypris Wins Award for Permian Highway Pipeline Expansion Project

September 6, 2022

Will Supply High-Pressure Closures Weighing up to 20,000 Pounds Each

LOUISVILLE, Ky.--(BUSINESS WIRE)--Sep. 6, 2022-- Sypris Technologies, Inc., a subsidiary of Sypris Solutions, Inc. (Nasdaq/GM: SYPR), announced today that it has recently received an award for specialty high-pressure closures for use in the Permian Highway Pipeline Expansion Project. Shipments under this award are expected to be completed by year-end. Terms of the order were not disclosed.

The Permian Highway Expansion Project (the "Project") will provide an outlet for increased natural gas production from the Permian Basin to growing market areas along the U.S. Gulf Coast, including new LNG facilities, according to news sources. The Project is expected to increase the capacity of the Permian Highway Pipeline by approximately 550 million cubic feet per day.

According to news releases, the expansion couldn't come at a more critical time and is expected to foster future natural gas production growth in West Texas and provide several LNG facilities along the Texas Gulf Coast with a more affordable, reliable supply. The Project is also expected to alleviate transportation constraints out of the Permian Basin in support of growing domestic and global energy demands. The Project is proposed to be in-service by late 2023.

Sypris has agreed to manufacture and supply its Tube Turns®-branded specialty, high-pressure Tool-less® and Threaded closures for use on the filtration systems for the Project. These closures will range in size from 12" to 70" in diameter and will weigh from an estimated 250 pounds up to as much as 20,000 pounds each and will be rated to a pressure of 1,541 psi.

Brett Keener, General Manager, commented, "Sypris continues to be a leader in supplying high-pressure specialty closures to support major energy projects globally. By leveraging our extensive engineering design and manufacturing expertise, we believe we are uniquely qualified to support these types of demanding requirements. We are proud to be a part of a project with a goal to help provide reliable energy and improve lives around the world."

Sypris Technologies, Inc., Tube Turns Products, is a global leader in the manufacture of custom engineered products for high pressure critical applications serving multiple industries such as the oil and gas pipeline, hydrocarbon and petrochemical processing, food, pharmaceutical, water and utility since 1927. Headquartered in Louisville, Kentucky, the Company's products are marketed worldwide, and can be found in projects ranging from the Trans Alaska Pipeline and Strategic Petroleum Reserve in the U.S. to the Tengiz Oil Field in Kazakhstan and the Bonny Island Gas Field in Nigeria. Forward-Looking Statements

This press release contains "forward-looking" statements within the meaning of the federal securities laws. Forward-looking statements include our plans and expectations of future financial and operational performance. Each forward-looking statement herein is subject to risks and uncertainties, as detailed in our most recent Form 10-K and Form 10-Q and other SEC filings. Briefly, we currently believe that such risks also include the following: our failure to achieve and maintain profitability on a timely basis by steadily increasing our revenues from profitable contracts with a diversified group of customers, which would cause us to continue to use existing cash resources to fund operating losses; our failure to successfully complete final contract negotiations with regard to our announced contract "orders", "wins" or "awards"; dependence on, retention or recruitment of key employees and highly skilled personnel and distribution of our human capital; cost, quality and availability or lead times of raw materials such as steel, component parts, natural gas or utilities including increased cost relating to inflation; our failure to successfully win new business or develop new or improved products or new markets for our products; our ability to integrate new customers or suppliers, and in turn cause increases in our inventory and working capital levels; the impact of COVID-19 and economic conditions on our future operations; possible public policy response to the pandemic, including U. S or foreign government legislation or restrictions that may impact our operations or supply chain; the cost, quality, timeliness, efficiency and yield of our operations and capital investments, including the impact of inflation, tariffs, product recalls or related liabilities, employee training, working capital, production schedules, cycle times, scrap rates, injuries, wages, overtime costs, freight or expediting costs; disputes or litigation involving supplier, customer, employee, creditor, product liability, warranty or environmental claims; our reliance on a few key customers, third party vendors and sub-suppliers; inventory valuation risks including excessive or obsolescent valuations or price erosions of raw materials or component parts on hand or other potential impairments, non-recoverability or write-offs of assets or deferred costs; failure to adequately insure or to identify product liability, environmental or other insurable risks; unanticipated or uninsured product liability claims, disasters, public health crises, losses or business risks; the costs of compliance with our regulatory or contractual obligations; labor relations; strikes; union negotiations; our inability to patent or otherwise protect our inventions or other intellectual property from potential competitors; adverse impacts of new technologies or other competitive pressures which increase our costs or erode our margins; our reliance on revenues from customers in the oil and gas markets, with increasing consumer pressure for reductions in environmental impacts attributed to greenhouse gas emissions; changes in legal rights to operate, manage our work force or import and export as needed; inflation; war, geopolitical conflict, terrorism, or political uncertainty, including disruptions resulting from the conflict between Russia and Ukraine arising out of international sanctions, foreign currency fluctuations and other economic impacts; cyber security threats and disruptions, including ransomware attacks on our systems and the systems of third-party vendors and other parties with which we conduct business; or unknown risks and uncertainties. We undertake no obligation to update our forward-looking statements, except as may be required by law.
